

Summer Term!!!

We are all becoming professional artists!

Over the half term we are going to be exploring different media and the affects they can create in our art gallery and also how we can join and make moving parts and mechanisms.

We are leaning all about Kandinsky and how his abstract pictures changed people's views on art.

As we move from the circles in Kandinsky's pictures we are going to look at the circles on the Olympic flag and the wheels on the chariots.

We are going to learn about how and where the Olympics started and make our very own chariot. We are going to be practicing our sports skills as who knows we may be the next Jessica Ennis or Mo Farrow!

Our health is an important factor in our lives and we are going to be looking at staying healthy and making good 'swaps' in the activities we do and the foods we eat.

As always we would love you to come in and support us with our learning. If you would like to come in and listen to readers, help with an activity or maybe even bring in something to show linked to our learning - we will always welcome the support.
