

All About Me!

We are going to spend this half term sharing information about ourselves and learning about our friends.

We will be looking at our route to school and describing the things we see on our journey. We will also be talking about how we celebrate occasions like birthdays in our families, and looking at how famous people and children from other cultures celebrate their special day.

Our bodies are very special and we are going to be learning all about the different parts, including our 5 senses. We will be finding out about how they work by creating and carrying out our own scientific investigations! Our doctor's role play is helping us to develop our knowledge of our bodies and how we care for ourselves.

In art and CDT we are going to be exploring different media to create self-portraits with a range of colour, texture and depth.

Each of us is special in our own way so we are going to be sharing what makes us special, what we are good at, what we would like to get better at and setting ourselves goals.

Everybody likes to hear kind comments so we are going to be ensuring we are encouraging our friends with positive and friendly comments.

We will be using apps on the iPads and exploring our learning environment both inside and out!

If you have a spare 5 minutes in your busy week, we always welcome help from families and friends.

We look forward to getting to know each other as our half term develops.
