

# Design Technology

Children will build resilience through their work and are encouraged to learn from their mistakes.

Children design within real life contexts and to given criteria. They communicate their ideas appropriately.

Children critique, evaluate and test their ideas and products and the work of others.

Children understand and apply the principles of nutrition and learn cooking methods.

Children can measure and make templates accurately, manipulating sheet and construction materials successfully.

Children work safely with a range of tools and understand food hygiene procedures.

Children can colour, cut and join fabrics, use decorative techniques and fastenings appropriately and in a range of ways.

## IMPACT

Children understand how structures can be strengthened or made more stable.

Build and apply a repertoire of knowledge, understanding and skills in order to design and make a range of prototypes and products.
