

GROWING

We are going to be exploring our environment around us and looking at how what we do affects our world.

We will be sharing stories linked to growing and our environment.

We are going to become 'plant experts' naming and drawing different wild flowers, looking at environments that sustain them and the different parts and functions of each flower.

Our messy area will start to look like a meadow as we make flowers with moving parts and meadow pictures. Watch where you walk as our clay mini beasts start to roam around our room!

Our visit to the Norfolk Show will introduce us more to 'Norfolk Life' and what is traditional to our county.

We will be celebrating the Queens 90th birthday with a street party lunch, party games and walking to the green to see a black popular tree being planted in her honour.

We will look at our fourth and final season, summer. We will see what grows, how our world starts to change around us and what summer looks like to us.

As our year comes to an end we will be bringing together all we have learnt in maths including number and place value, addition, subtraction, multiplication, division, fractions, time, handling data and word problems.

We are excited as always as our learning takes us on a new adventure!
